PRODUCT DETAILS

AEG CONDENSATION & HEAT PUMP PAIRS

AEG Condensation and Heat Pump laundry pairs include a 120V washer and 240V dryer. These each plug into the standard North American laundry room electrical configuration.

GORENJE CONDENSATION PAIR

Rated 208/240V for both the washer and dryer. This set includes an Adapter box for pairing. This fused adapter box provides 2 × 240V/15 AMP receptacles which accommodates each unit. The dryer is equipped with a 30 AMP dryer cord which plugs into the existing NA dryer receptacle and allows both units to operate simultaneously. The Adapter box is provided free of charge. This pair also includes suction cups for stacking, which are included with the dryer.

GORENJE VENTED & HEAT PUMP PAIRS

Rated 208/240V, 60 Hz for both the washer and dryer, 30 AMP circuit. These sets include a rear-mounted Junction box on the dryer which the washer plugs into, so both units operate simultaneously. Suction stacking vacuum feet are included with the washer for these models, as well as anti-tip brackets and mounting plates.
